

onRhumb presents

Setting Up Claude Code

A procurement pro's getting-started guide

Wolf Pack Summit 2026 · Nashville · April 15-16

Presented by Rob Nichol · onRhumb

pack.onrhumb.com

Agenda

1. What you need before you start
2. Installing Claude Code
3. Your first project
4. Power-user moves

What You Need First

- Anthropic account
- A terminal (Mac, Windows, Linux)
- Basic file/folder mental model
- 30 minutes of patience

[Add your talking points here]

What You Need First

- Open the desktop app, click the Cowork tab, and point it at ONE folder.
- Create read-only subfolders (About Me, Templates, Projects) and one write folder (Claude Outputs).
- Set a file-naming convention like `project_type_v1.ext` so outputs stay tidy.

[Download for Windows](#)

[Download for Mac \(Apple Silicon\)](#)

[Download for Mac \(Intel\)](#)

[Add your talking points here]

Installation Walkthrough

- Install Node.js
- Run the install command
- Sign in
- Verify it's working

[Add your talking points here]

Your First Project

- Create a folder
- Tell Claude what you want
- Watch it work
- Iterate
- Screenshots!!!

[Add your talking points here]

Power-User Tips

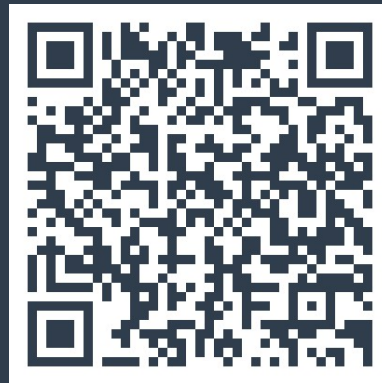

- Slash commands
- MCP servers
- Subagents for parallel work
- Skills
- Hooks
