

onRhumb presents

Vibe-Coded Web Page Builder

The cheat sheet for shipping a real page

Wolf Pack Summit 2026 · Nashville · April 15-16

Presented by Rob Nichol · onRhumb

pack.onrhumb.com

Agenda

1. Pick your stack
2. Prompting for pages
3. Deploying in minutes
4. Common pitfalls (and fixes)

Pick Your Stack

LETS GET “REAL” HERE

- I have no ide what tools you’ll need, nor the tools Claude uses for me
- React / Astro / plain HTML – oops... Greek to me!
- Where it'll live – this we can do
- Cost vs control trade-offs – I don’t know enough to help here... ask your LLM

[Add your talking points here]

Prompting for Pages

- Describe the audience
- Show, don't tell (paste examples)
- Ask for one screen at a time
- Iterate on copy and layout separately

[Add your talking points here]

Deploy in Minutes

- Netlify drop
- Vercel
- GitHub Pages

[Add your talking points here]

Common Pitfalls & Fixes

- The page works locally but not in prod
- Forms don't submit
- Mobile looks broken
- Where to ask for help

[Add your talking points here]

Web Page starting prompt (Copy and Paste)

- I want you to help me build a requirements document to collect my thoughts so we can build a web page. I want the page to be able to do [X] for [Y] user group.

I like the following colors:

I DO want this to be able to:

I DONT want this site to:

Ask me any follow up questions necessary.
